

The Adèle Archive: Night of Silence

A four-player silent chamber experience about complicity, grief, and the making of a holy lie.

SILENT CHAMBER EXPERIENCE · 4 PLAYERS + FACILITATOR · APPROX. 90-120 MINUTES · ENGLISH ADAPTATION / BILINGUAL DEVELOPMENT · IN DEVELOPMENT

CORE PITCH

Night of Silence places four participants inside the sealed room where the first official account of Adèle's death will be assembled - not to solve a murder, but to decide how a holy lie begins.

PREMISE

The experience is set on the night Adèle dies, before the archive exists and before the Mother Goddess myth has hardened into public history. Four attendants or institutional functionaries remain inside the sealed chamber. Each holds a partial record: a body report, a textual revision, an object register, a night log, or another fragment of the final hours. The central question is uncomfortable: what version of Adèle's death will be written first, and who benefits when silence becomes official language?

PLAYER EXPERIENCE

Players read, arrange, withhold, mark, and submit evidence under increasing pressure. Conversation begins possible, then becomes restricted and may eventually be replaced by gestures, word tokens, evidence placement, and report choices. The experience is low-pressure and does not require heavy theatrical performance or competitive deduction. The tension comes from limited speech, conflicting obligations, and the act of writing a record that may become history.

FORMAT

- Players: 4 players + facilitator
- Duration: approx. 90-120 minutes
- Space: one enclosed room, table, or black-box setup
- Facilitation: one operator / GM
- Materials: evidence cards, word tokens, report sheet, audio cues
- Interaction: restricted speech, document handling, ethical report-making

THEMES

Silence · Complicity · Institutional language · First myth-making · Grief · Archival responsibility

WHY IT FITS

Night of Silence is suitable for a contained black-box setup, chamber reading, low-tech immersive workshop, or Jubensha-adjacent facilitated experience. Its scale is intentionally modest: four players, one facilitator, printed materials, audio cues, and a clear final report structure. It can be tested early without requiring a large cast, complex set, or performance-heavy player commitment.

DEVELOPMENT STATUS

The project is in development as a companion piece to She Was Not a Goddess: The Adèle Archive. This pitch is a concise overview for private review. A sample kit can be prepared with role overview, evidence fragments, speech restriction rules, ending structure, and content / safety note.

CONTENT NOTE

Content note: death, institutional control, bodily autonomy, religious language, psychological pressure, grief, implied coercion, and enforced silence. No graphic violence is required in the current design.

This is not a game about solving a murder. It is about writing the first sentence of a myth.
